Pininfarina Extra, is part of the world-famous design house Pininfarina, whose history traces back to 1930 when the company was established by Battista Pinin-Farina, who became the most acclaimed car designer of his time For example the Cisitalia 202 by Pininfarina (1947), was the first and only car to enter into a permanent display at the MoMA of New York, in 1961. Up to today, more than 100 Ferrari cars that have gone into production have been designed by Pininfarina.

In 1986, the third generation of the Pininfarina family created Pininfarina Extra srl to extend the design capabilities of the company, outside of the automotive sector. Over the past 30 years, Pininfarina Extra has developed more than 600 projects under the direction of its President and Chief Executive Officer, Paolo Pininfarina (now Chairman of the Pininfarina Group), and has established its own direction and a clear identity.

Today the company has ventured into a variety of commodity sectors where products bearing the Pininfarina name have won acclaim in the world's leading markets. "Armonia" has been conceived to bring the elegance of the interior environments to the outdoor spaces, creating a seamless and elegant living experience. The juxtaposition of contrasting elements is the main component around which the design language of this new sofa plays. The use of wood and braided rope gives it an artisanal and classic look, balanced by the modernity of the clean lines and the shaped body. The play of contrasts continues through the dualism between soft and rigid surfaces, full and empty spaces, modernity and past, reflecting the style of Pininfarina centered on the tradition of the new.

TEKNO/R

This parasol draws inspiration from the billowing sails of a ship in the blue Aegean Sea and the Turkish "Evil Eye", a symbol of protection and good luck for sailors. These strong sails help ensure a safe and smooth journey. Oval-shaped design elements applied to the edges of the canopy, the height adjustment handle, and the base. The overall design avoids sharp corners, enhancing user safety. The innovative two-piece canopy design allows for independent adjustment of the opening angles. When adjusted or retracted, it can also function as a screen. When fully opened, the canopy spans 2.05 meters, providing ample shade for large outdoor leisure spaces. Overall size (WxLxH): 205x273x283cm

The product can be rotated 130 degrees laterally using a foot pedal, allowing for easy angle adjustments based on usage needs. The canopy features a three-position adjustment on one side, providing multi-angle protection against wind and rain.

The base, made of an aluminum alloy frame combined with detachable marble, has a sleek, elegant design and weighs 130 kilograms.

The canopy fabric is made of acrylic, which is water-resistant, UV-protective, and durable.

Due to its unique design, it has been awarded the 2024 Red Dot Design Award. Designed by Claudio Bellini.
